Financial Risk Analysis
Rules Based Fraud Detection

Explainable financial risk and fraud intelligence dashboard.

See risk sooner.
Understand every alert.

THE CHALLENGE

Financial teams face mounting data.
Risk hides in the noise.

Massive transaction volumes mask **unusual activity**

Detecting signals late means **greater exposure**

Teams need timely, explainable insights to **act with confidence**

THE SOLUTION

Sentinel

a full-stack financial risk
and fraud intelligence platform

One platform, two powerful ways to act

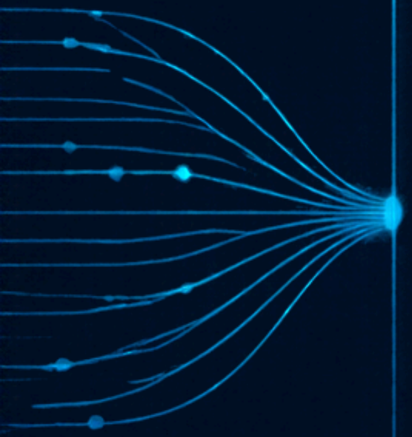
Monitor activity and risk in **one place**

Explore transactions with **complete context**

Screen new transactions in **real time**

Built to **scale** across your business

HOW IT WORKS



TRANSACTION SIGNALS

amount

velocity

merchant category

geography

declines

time

RISK SCORING ENGINE

weighted rules assess risk

RISK SCORE

78

/100

EXPLAINABLE DECISION

each alert shows which rules fired

high amount

rapid velocity

unusual geography

multiple declines

RISK SCORING

Clear thresholds.
Transparent rules.
Confident decisions.

Scores determined by a **rule-based** engine

Rules are transparent and configurable

THE DASHBOARD

All the risk intelligence you need, in one view.

Risk distribution and trends

See risk across your business and over time.

Searchable transaction explorer

Find and investigate any activity in seconds.

Live alert feed

Monitor emerging threats as they happen.

Transaction detail

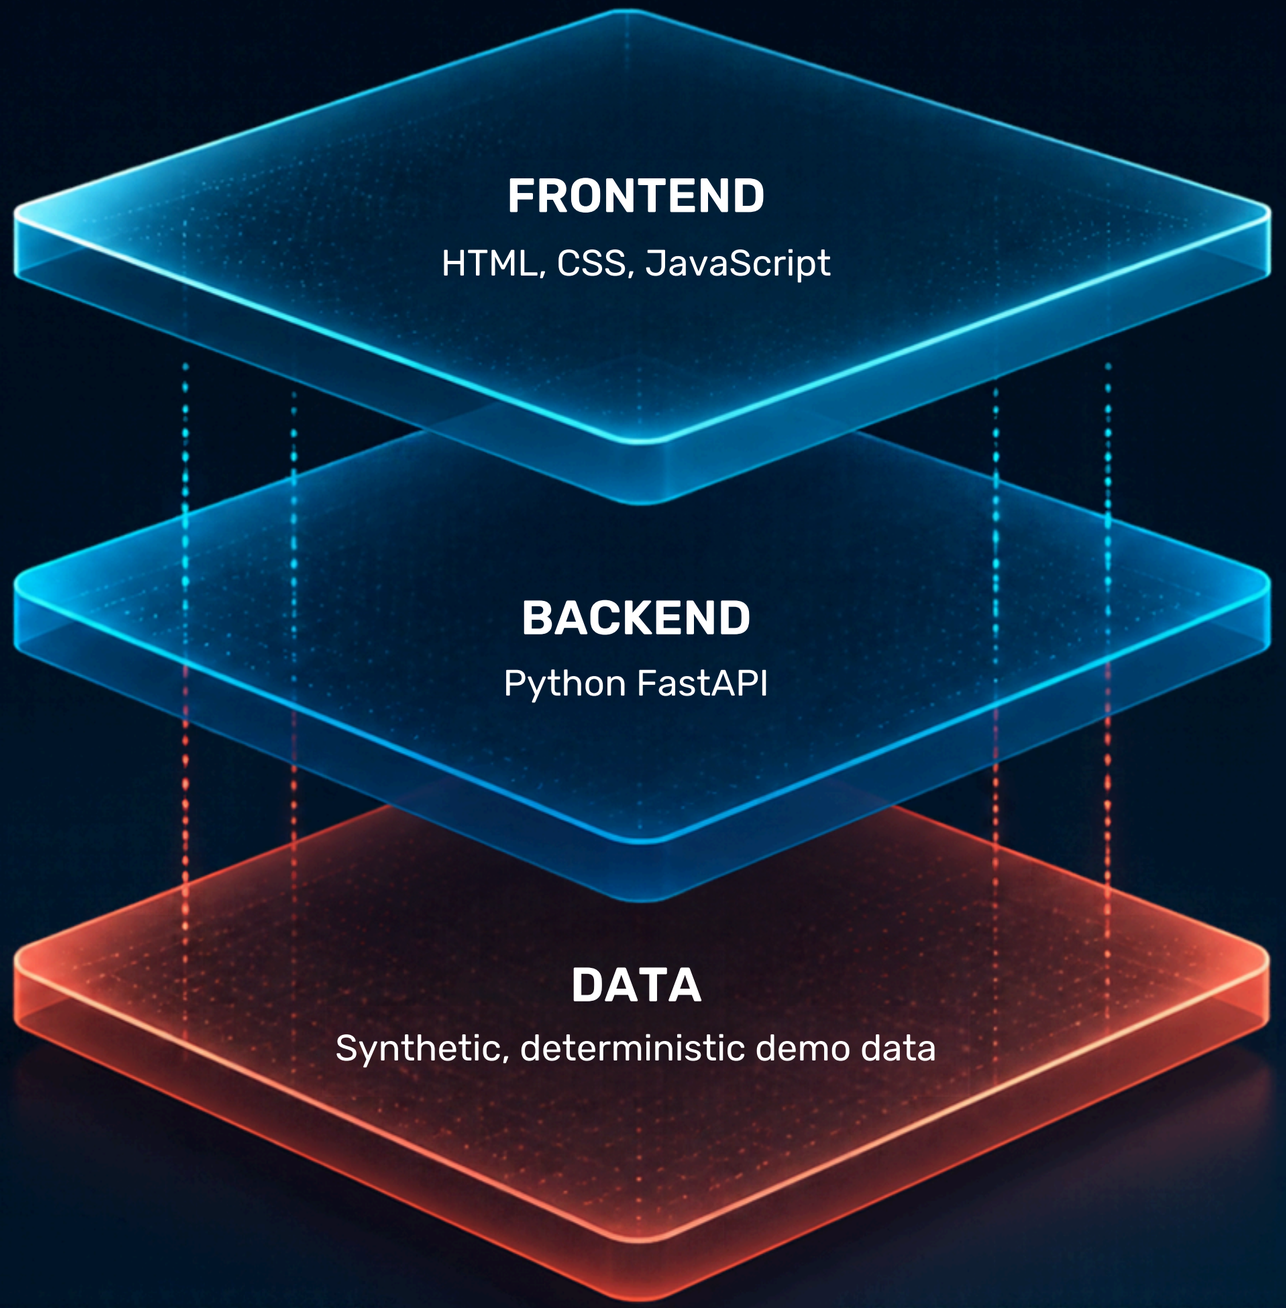
Deep context to understand every alert.

BUILT FOR CLARITY

Responsive web experience
with **HTML, CSS,** and **JavaScript**

Fast, reliable backend
powered by **Python FastAPI**

Synthetic, deterministic demo data
No personal data. Ever.



NEXT STEPS

Validate rules against real operational needs

Tune thresholds with domain experts

Sentinel makes risk signals easier to see and explain
